PROFESSIONAL SUMMARY

Full Stack Developer with expertise in modern web technologies. Proven track record building production-grade applications with Next.js, React, Node.js, and TypeScript. Specialized in designing scalable architectures, implementing secure payment systems, and optimizing performance. Currently developing at Wise360 Solution.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Wise360 Solution

Jul 2025 – Present

- Architected and developed scalable full-stack web applications using Next.js, React, and Node.js, delivering high-performance solutions for enterprise clients
- Designed and implemented RESTful APIs with Express.js and PostgreSQL, handling complex business logic with 95%+ uptime and sub-100ms response times
- Built responsive user interfaces with Tailwind CSS and React, ensuring pixel-perfect designs across all devices with 99% accessibility compliance
- Implemented secure authentication and authorization systems using JWT and session management, protecting sensitive client data across applications

Tech Stack: Next.js, React, TypeScript, Node.js, Express, PostgreSQL, MongoDB, Tailwind CSS

Junior Full Stack Developer | Robotic World

Nov 2024 – Jun 2025

- Developed full-stack web applications from concept to production using React, Node.js, and Express, delivering features with zero critical bugs
- Created RESTful APIs and optimized database queries with PostgreSQL and MongoDB, achieving 40% improvement in application performance
- Implemented responsive UI components with Tailwind CSS and Framer Motion, improving user engagement by 35% through smooth animations and intuitive design
- Collaborated with team members on code reviews and debugging, maintaining clean architecture and following SOLID principles throughout development

Tech Stack: React, Node.js, Express, PostgreSQL, MongoDB, Tailwind CSS, JavaScript, Git

Frontend Developer Intern | Uran Codematic

Jan 2024 – Mar 2024

- Developed and maintained client-facing web applications using React and modern JavaScript, reducing bug reports by 30% through careful component testing
- Collaborated with design team to implement pixel-perfect, responsive UIs with Tailwind CSS and mastered responsive design principles
- Built reusable React components with clean, well-documented code, improving team productivity and maintainability across projects
- Gained hands-on experience with Git version control, agile workflows, and best practices in frontend development and collaborative coding

Tech Stack: React, JavaScript, Tailwind CSS, HTML5, CSS3, Git, REST APIs

FEATURED PROJECTS

VendorHub — Multi-Vendor E-Commerce Platform | *Production* | 2025

Production-ready multi-vendor marketplace with Stripe payments, Cloudinary image management, role-based access for 3 user types and 50+ documented API endpoints.

Key Features:

- Vendor Store Management with admin approval workflow and automatic product deactivation on vendor suspension
- Product Catalog with multi-image upload (Cloudinary), full-text search, category filtering, and individual image deletion
- Stripe Payment Integration with Payment Intent flow, webhook handlers for 3+ events, and automatic refunds on order cancellation
- Role-Based Access Control (Customer, Vendor, Admin) with fine-grained permissions enforced via middleware on every endpoint
- Vendor Earnings Analytics with real-time dashboards, monthly charts via Recharts, and automatic updates on order completion
- Smart Coupon System with 6+ server-side validation checks, usage limits, and expiry management
- JWT Authentication with silent refresh — 15-min access tokens, 7-day refresh tokens with Axios request queue
- Order Lifecycle Management with explicit state transitions and vendor/customer actions at each stage

Tech Stack: *Next.js 15, TypeScript, Node.js, MongoDB, Redux Toolkit, Stripe, Cloudinary, Tailwind CSS*

GitHub: <https://github.com/officialmuhammadusman/vendorhub-frontend>

Sortana — Dashboard Application | *Production* | 2025

Designed and built comprehensive dashboard application with integrated REST APIs. Developed responsive dashboard screens for data visualization and real-time analytics. Implemented dashboard APIs for efficient data fetching, aggregation, and performance optimization.

Live: <https://frontend.sortana.com>

TECHNICAL SKILLS

Frontend: React 18 / Next.js 15 (Expert), TypeScript (Expert), Tailwind CSS (Expert), Framer Motion (Advanced), Jest & React Testing Library (Advanced), Redux Toolkit, Context API

Backend & APIs: Node.js / Express.js (Expert), REST APIs with OpenAPI/Swagger (Expert), JWT / OAuth2 (Advanced), WebSockets / Socket.io (Advanced), Microservices Architecture (Intermediate), Rate Limiting & Security (Advanced)

Databases: PostgreSQL (Expert), MongoDB (Expert), Redis (Advanced), Prisma ORM (Advanced), Query Optimization & Indexing (Advanced)

Tools & Platforms: Git & GitHub, Postman, Docker, Webpack, NPM, Vercel, AWS, Cloudinary, Stripe API, WebSockets

Currently Learning: FastAPI, Vector Databases, RAG Architecture, AI/LLM Integration

EDUCATION

Bachelor of Science in Computer Science

2021 – 2025

COMSATS University Islamabad, Abbottabad Campus
